DESIGNER STYLE TIP

Whatever your style, our collection has something for you. Whether you know exactly what you want or need some help, here are some tips to consider when choosing your new window shading.

your room

Consider where and how you plan to use your blinds. Will they allow light in or block it out? Privacy and sleep might also play a key role in your decision. Think about the function of the room, as this will help guide your choice.

your fabric

Once you've decided on the use of your blinds, you can choose from our range of fabrics, including blackouts, sheers, moisture-resistant, recycled, plains, textures and patterns.

your color

Choose colors that complement the existing finishes and materials in the room. For redecorating, create a mood board with interior images, furniture, paint swatches, fabric samples, and flooring.
